Mock Up Review

Mockup B is great!
-good layout (full bleed images are working well)
-nice color pallet and type choice
-nice image treatment

Steps for moving forward:
-Interactions: how will the interactions, hover states, scrolls, etc. evoke glass shattering? This is a matter of figuring out what's in your skill set, but even small interactions with some sort of shattering treatment are good.
-Scroll: What will the pages look like with more content to fill them out? Likely some will require scrolls and that may require new layout solutions. For next steps you should fill out the page with actual content so that you can see how much you have to work with.

No need for new mockups
